Date have been revised.

<Change>
Summary of Revision
has been added.

For consistency with IMDS

- 1) To change the format of IMDS upload file (XML)
- 2) To add function that converts the letters of norms at XML export

■ Revised Function of JAMA Sheet

■ Revised content

Change 1 Change in XML format

ex.) **Material standard**: JISH2123

Old: `<Norm NormCode="H2123" InstName="JIS"/>`

New: `<Norm NormCode="H2123" InstituteID="22"/>`

Change 2 Conversion from name to code

ex.) "JISH2123"

"JIS" → "22"

Note: only at XML export

"JIS" is shown on JAMA sheet and on csv file as of the former situation

(Supplemental remarks)

Data compatibilities between Old versions and Ver. 3.01

(1) External List

Not compatible

Users must use the external list Ver.3.01.

The external list of Ver. 3.00 or older cannot be used because some of functions, such as material selecting function, doesn't work properly.

(2) CSV file

Compatible (by automatic conversion at the first error check)

The JAMA Standard Material Datasheet can import CSV files created by older version sheet (From Ver. 2.01 to Ver. 3.00).

However some errors may occur because of the modification of materials and substances in the new external list.

In case of errors, the data has to be corrected.
